

# March Webinars

Presented by Jeff S. Holmes, P.E. CSI, CDT

## **3/5 - Managing Condensation, Water Intrusion and Energy in the Real World - 12 PM CST**

Window-opening air and water leakage has been a difficult problem for the construction industry. This course evaluates building failures, conventional construction approaches, and new developments in waterproofing techniques to show a path forward for designers seeking higher-performing wall assemblies.

## **March 12 - Polished Concrete: From Start to Maintenance - 12 PM CDT**

This presentation explains the benefits of polished concrete flooring, including aesthetics, abrasion & stain resistance, sustainability, and reduced maintenance costs. We discuss the products and procedures involved in each flooring job type from new to restoration. Participants will discover the importance of jobsite mockups and how they are used to manage expectations. The program also shows how to protect and maintain finished concrete flooring according to flooring use. It includes tips for protecting finished floors from damage during building construction and beyond.
